INTERNATIONAL REQUEST FOR ENTRE-YOU TRAINING

As you know, the ENTRE-YOU training materials are ready, the piloting is currently carried out. In the meantime, as the word about ENTRE-YOU is spreading, we have several different institutions already interested in implementing our training program across Europe.

Erasmus+

Interest for Entre-YOU in Croatia:

With the support of the Croatian Employment Service - Regional Office Zagreb, model ENTRE-YOU has piloted by 27 long-term unemployed young people up to 25 years old. Interest was high, and the use of the model will continue with other interest groups of long-term unemployed young people.

Also, in cooperation with the Craft College - the contact point for EBC * L in Croatia, model ENTRE-YOU will be offered as an additional part of basic entrepreneurial skills.

Here is the testimony from our project partner in Spain:

The relevant academic authorities have been informed about the participation of Blancafort in the European project ENTRE YOU and requested authorization to carry out a pilot test with students who are in the center forming themselves to obtain a Certificate of Compulsory Secondary Education and whose age oscillates between The 16 and 20 years.

Not only was it reported positively to be able to carry out this pilot test, but also expressed an interest in knowing the project follow-up as well as the evolution of the test and its results.

There is interest for ENTRE-YOU in the Netherlands:

We have spoken to different organizations about the Entre You project and they were all enthusiastic.

Different governments, such as the province council and different town councils are interested and curious about the results. They want to be informed and want to talk with us about what to do with the results.

The province council is asked to join us at the conference in Zagreb to take note of the final results. There isn't a final answer yet if they will join us, but the first reactions were positive.

Finally we spoke to different schools who educate the target group where we make the project for. They were really enthusiastic and want to take notice of the program. The translation of the program in Dutch is essential for the use in the schools.

So all signs are positive and we have to take the last steps to finish the project so that we can implement the program in the schools and the different projects in towns for the youth.
